Titan Digital Output Prints are **photo quality** prints made from the highest quality pigmented inks, archival **luster and glossy paper** available. Photos are made on state of the art Epson and Canon printers.

All Digital Output Prints are color and density corrected to produce the highest level of print quality obtainable from your computer files.

When your schedule allows, we will show you test prints of your photos for your approval. We cannot, however, guarantee exact matches to other photos or artworks. We will use your reference prints as a guide when required.

If retouching, image compositing or other art-work is required, **see page 8, Computer Art Time.**

Any original, slides, negatives, original art, etc. can be made into Digital Output prints, **See page 3** for more information on **Scanning and Digital Capture Services**, or for more information, see **page 9, Digital Print Output Guide.**

*For Wallets from portrait files, we can add the name and date in the corner of the photo, and round the corners at no additional charge.

Normal Service: Approx. 3-5 working days

*Additional print prices are for extras of **each image file** after the first print price.

Titan Digital Output Prints are **photo quality** prints made from the highest quality pigmented inks, and **canvas** available. Photos are made on state of the art Epson and Canon printers.

Canvas on Stretcher bar: Add print length to print width x \$1.00 for price for stretcher.

Example: A 20x24 would cost 20 + 24 x \$1.00 = \$44.00 for the stretcher.

Canvas Protective Coating: See **Protective Laminates** page 10.

Normal Service: Approx. 5-8 working days (after test print approval when required).

All Digital Output Archival Canvas Prints are color and density corrected to produce the highest level of print quality obtainable from your computer files.

When your schedule allows, we will show you test prints of your photos for your approval. We cannot, however, guarantee exact matches to other photos or artworks. We will use your reference prints as a guide when required.

If retouching, image compositing or other art-work is required, **see page 8, Computer Art Time.**

Any original, slides, negatives, original art, etc. can be made into Digital Output prints, **See page 3** for more information on **Scanning and Digital Capture Services**, or for more information, see **page 9, Digital Print Output Guide.**

Normal Service: Approx. 3-5 working days

The finest in **Giclée** art reproduction. We use the highest quality pigmented inks, archival art paper, and canvas available. Photos are made on state of the art Epson and Canon printers. Prices include up to 1" of white border for prints on art paper, and 2" border for canvas.

Surfaces Available: Canvas or Art Paper(Smooth Standard).

Canvas on Stretcher bar: Add print length to print width x \$1.00 for price for stretcher.

Example: A 20x24 would cost 20 + 24 x \$1.00 = \$44.00 for the stretcher.

Canvas Protective Coating: See **Protective Laminates** page 10.

Normal Service: Approx. 5-8 working days (after test print approval when required).

Giclée Printing Procedures

- 1 - The first step in the **Giclée** process is the creation of the digital file. (See page 8 for more details on **Digital Capture** pricing)
- 2 - With the digital file in hand, our computer artists optimize the image file by adjusting the density, contrast, and saturation to create an overall pleasing image in preparation for the print testing phase.
- 3 - The image file is then tested on one of our state of the art color printers. At this stage, if the customer has suggestions for changes or enhancements, the image file is adjusted. **Additional computer time charges may apply when the corrections are extensive.**
- 4 - After customer approval, the final Giclée prints are printed on archival, acid free art paper or premium grade archival canvas material.

DIGITAL CAPTURES FROM ART AND PHOTOGRAPHS

(from art-work, photos, or 3 dimensional art)

	Capture Price	Final Print Size Recommendation
20 mb	20.00	8x10
35 mb	35.00	11x14
50 mb	45.00	16x20
80 mb	65.00	20x24
100 mb	90.00	24x36
125 mb	100.00	30x40
150 mb	125.00	36x48
150+MB	\$1.00/Meg	over 36x48

Your art-work is carefully photographed directly into digital file format in preparation for Fine-Art **Giclée** Reproduction Prints, Digital Output prints, or personal use.

Every detail of your art-work is preserved with our proven photographic techniques. We can produce files to enhance or subdue the texture of your art-work. The choice is yours.

FRAMED OR LARGE ART PIECES SUBJECT TO ADDITIONAL SET-UP CHARGE.

Files to CD; add \$10.00. Thumbnail on CD cover; add \$5.00.

Normal Service: 48 hours

SCANS FROM FILM (NEGATIVES AND TRANSPARENCIES)

File size	1-3 Scans	4-10 Scans	11-up Scans
1-12 mb*	12.00	11.00	10.00
13-20 mb	20.00	18.50	16.00
21-35 mb	25.00	23.50	21.00
36-50 mb	30.00	28.00	26.00
51-65 mb	35.00	33.00	31.00
66-80 mb	50.00	46.00	43.00
81-100 mb	65.00	60.00	56.00
101-150 mb	80.00	75.00	72.00
151-200 mb	100.00	95.00	90.00
201-500 mb	125.00	120.00	115.00
Over-500mb	150.00	140.00	130.00

*** FROM 35MM FILM SIZES ONLY, ALL OTHER FILM SIZES START AT \$20.00**

Our **High Resolution Scanner** scans negatives and transparencies up to 8x10, without messy oil or glass, resulting in clean, high quality scans.

Files to CD; add \$10.00. Thumbnail on CD cover; add \$5.00.

Normal Service: 48 hours.

FILE SIZES and RESOLUTION

To simplify the task of calculating correct file size and scan resolution for your project, we have created the charts below. They are based on our experience, and should suffice for most applications. If you have specialized needs beyond the scope of these charts, or any file preparation questions, please call us for assistance.
(248) 689-3040

FILE SIZES: For Direct Output to Titan Digital Output Prints.

Final Photo Size	RGB
8x10	20-25mb
8.5x11	25-35mb
11x14	40-50mb
16x20	60-80mb
20x24	85-90mb
24x36	100-120mb
30x40	105-140mb
36x48	140-160mb
44x56	160+mb

COMPUTER RETOUCHING TIME

\$60.00 per hour (No minimum charge)

Whether your project involves image composition, minor retouching or major overhaul, our computer artists can give your work the finished professional look you are striving for. Charges and service time for Computer Art Time are based on the complexity of your job. Files can be uploaded to us via our OnLineFileFolder. Call for instructions.
 E-mail: titanphoto@att.net

FLASH DRIVE STORAGE 16GB

Amount of data written	Price
Up to 16GB.....	15.00

Up to 16GB of digital data can be written to a storage drive. This may include scans, files from digital jobs, or any other files that you need to archive.

Normal Service: 24 hours

DIGITAL PRINT OUTPUT GUIDE

Preparing your files for digital output: Below is a list of our recommendations.

- Good file preparation is necessary for quality output prints from digital files. Unless you are a PhotoShop wizard with a deep knowledge of digital camera techniques, the best thing you can do with your digital files is to leave them alone and let us optimize them for you. We will produce the best quality image obtainable from your file.

Simple Tips:

- Take pictures with the highest resolution digital camera you can afford, and always shoot at the highest resolution setting available.
- It isn't necessary to re-size your files to 300ppi in PhotoShop. If you have already made changes to your files, don't worry about it, we'll make the best possible prints from the files you have.

More advanced Tips:

- If you are a PhotoShop person and you wish to attain the highest quality images you can from your digital camera, shoot in Camera Raw.
- If color and density is critical, make an inkjet print of your own to your specifications, and give it to us as a reference. Otherwise, we can supply you with test prints of your file at no additional charge.

Common Mistake:

- A common mistake is to shoot your pictures in jpeg format and adjust the image too much. Jpeg is a compressed file format. Every change you make to your file can affect your final image quality. For best results, give us the original Jpeg file that you shot.

Scanned Images:

- A lot of the above mentioned information also applies to scanned images. When you do your own scanning, try to work in 16bit whenever possible, and remember, it's not necessary to re-size your file. Scan for a file size of at least 200-300ppi at final print size.

We're here to help:

- If all of this information is too much to grasp, call us and we will gladly help you through the process. Creating quality output photographs requires knowledge and attention to many details. **(248) 689-3040**
